

## **IN THE SPECIFICATION:**

Please rewrite the paragraph beginning at page 5, line 1 as follows:

It should be apparent from the foregoing that the starting methods described above can be implemented in many ways. For example, a wide variety of capacitors can be used, including capacitors such as those described in the following patent documents: PCT/RU 95/00170, PCT/RU 95/00171, U.S. patent application 09/206,600. The capacitor is preferably ~~mounted~~ mounted externally of the vehicle, and as shown in FIG. 2, the capacitor may be mounted on a moveable cart, which may include a capacitor charging device normally powered by alternating current. The methods described above can be used with internal combustion engines of any type, whether or not they are included in vehicles.
